What changed: Base license values in `src/data/states/*` were adjusted so charged totals ($\text{base} \times 3$, rounded to cents) match competitor sticker prices on usafishingassitant.com for 54 comparable SKUs.

Also: `displayPrice()` in `src/lib/state-config.ts` now rounds to the nearest cent.

Unchanged: Colorado and any SKU without a competitor counterpart. Competitor-only short-term multi-day products were not added.
